

Capability Statement

CAGE: 9Y1Z8 | UEI: DLS6EQNBB6P7

Manufacturer of industrial cleaning solutions with a focus in the construction and mining industries.

Years' Experience: 12+ years, dedicating the last four years to research, development, and manufacturing.

Actively developing a long-term dust suppressant to reduce water usage and increase soil stabilization. Customers: surface/underground mines, DOD, DOI, county roads, heavy civil construction.

Past Performances

Knife River: evaluated their previous truck wash program, developed, and implemented new program to reduce maintenance and improve their ready-mix fleet appearance in multiple states.

A Jay Concrete Pumping: reduced cleaning labor time by supplying a custom foaming-system to effectively clean their large pump trucks.

Treasure State Paving: provided a mobile cleaning station to keep their road paving equipment in working condition as they travel to each job site.

Core Competencies

- **Custom Solutions:** Capability to research and create customized cleaning detergents based on specific needs.
- **Application Understanding:** Knowledge of cleaning processes and equipment to recommend the most effective application methods.
- **Chemical Formulation:** Concrete removers, asphalt removers, heavy-duty oil, and grease remover.

Differentiator

- **On-site Evaluation**
- **End-user Training**
- **Ability to scale manufacturing**
- **Long-term laboratory and field-testing capabilities**
- **Willing to add unique products lines to meet market demands**
